

Special
Council
Meeting
Presentation-
C&D Site

Overview

- Introduction
- Objectives
- Activities
- Community feedback
- Community conversations
- Outsourcing & Service Delivery
- Opportunities
- Wrap up

Introduction

Andrew Chisholm

Presenting on behalf of a group of local community citizens who oppose the closure of the C&D site. These citizens have broad and diversified backgrounds and experiences but have come together on this item as they recognize the immediate, mid- and long-term impacts to our community.

Objectives

1. To save the operations of the C&D site while minimizing outsourcing
2. Grandfather operations for the next fiscal year to allow for a planned holistic service delivery model which may include garbage pick up, C&D operations, other disposal facilities and recycling opportunities.
3. Initiate a “operational review committee” for the C&D site that have citizen participants along side staff and other levels of government to assist Future State planning of the site.

ACTIVITIES to date

- Various community meetings
- Survey
- Petition- Have collected over 1000 signatures in roughly 2 ½ weeks
- Various AI driven research to understand topic and best practices
- EnviroScan of similar operations
- Outreach to neighboring facilities
- 1 on 1 conversations with family, friends and acquaintances

Community feedback

Removal/Reduction of C&D will:

- Decreased livability
- Result in Illegal dumping.(forests, lake and oceans)
- Increase fire risks
- Decreased competitiveness with other communities
- Increase carbon footprint. Risk of breach of environmental laws.
- Increased costs to community. Time, gas and tipping charges.
- Costs on contractor jobs will increase a minimum of \$400 which will reduce reno's and enhance structural decline within community
- Lost long-term opportunity funding opportunities from other levels of government.
- Hinder the economic development committee work.
- Decrease service delivery to citizens reducing the value proposition of taxes.
- Privatized garbage collection costs are skyrocketing. Why expand privatization?

Community Conversations

1. Perceived lack of transparency of municipality removing essential services while purchasing lands(land banking)
 2. **How is it that the C&D site would be closed prior to an alternate service delivery model being presented?**
 3. Taxes- taxes going up, services being removed, municipality land banking
 4. Amalgamation
- Tender Process- Many within the community indicate interest in the construction process but were unaware of the Municipal RFP. Was the province approached re preferred providers? This project was known about years ago.... What escalation path was taken? Was the province engaged to extend the deadlines.
 - Costs of the project seemed magnified/escalated re the work needing to be done.
 - Lack of meaningful consultation- example today
 - Businesses are leaving, why increase the burden?

Outsourcing and service delivery

- Municipal outsourced garbage service costs are skyrocketing. Why would outsourcing a substantially similar service not have similar outcomes. It would be prudent to analyze the municipal delivery of garbage and C&D operations.
- Who sets service standards, hours and fees charged to residents and businesses.
- Loss of infrastructure once outsourced
- Shifts responsibility, compliance and staffing obligations. Ultimately the municipality is still on the hook for service outcomes.
- This service will be an area of greater importance and funding going forward. Not advisable to lose control.

Process Questions

Was a steering group formed for this project? Who in executive was the Project Champion? When did this group form?

Was a work committee formed for this project. When was it formed?

When was funding challenges escalated? What escalation process took place. Did executive reach out to the province?

When assessing closing the facility how was the alternate service delivery model assessed when costs are unknown?

Has a environmental law review been conducted? When? Will we be in compliance. Who conducted the review?

Was a risk registry, communication plan etc completed? What was the sign off process

Opportunities

- Operational review committee to identify and realize potential operational savings and funding sources. Best practice: set up for ongoing cross service delivery initiatives.
- Build upon good will of community
- Enhanced service delivery, funding opportunities and revenue identification. Examples : Compost, cardboard, increased tip rates, centralized services, enhanced scope of facility. Centralized services.
- Train staff, provide more robust service delivery, save money- ie contract on dumping and crushing material.

Wrap up

Over 1000 residents have signed our petition opposing the closure of the C&D site –level of engagement that rivals, and may even exceed, voter turnout in the last municipal election. Council must reflect on whether it truly holds a mandate to proceed with this decision, given the scale of public opposition.

Please consider:

1. Save the operations of the C&D site while minimizing outsourcing
2. Grandfather operations for the next fiscal year to allow for a planned holistic service delivery model which may include garbage pick up, C&D operations, other disposal facilities and recycling opportunities.
3. Initiate a “operational review committee” for the C&D site that have citizen participants along side staff and other levels of government to assist Future State planning of the site.

Thank
you

Andrew Chisholm

West Green Harbour Dump

Protect Public Services

one

! What's Happening?

The Municipality plans to shut down the Regional Materials Recovery Facility in West Green Harbour and privatize waste services—without proper public consultation.

two

What's the Real Cost?

- \$1 million in upgrades deemed "too expensive"
- But privatization could mean higher costs for residents and less local control

three

Why It Matters

This facility handles:

- Construction & demolition waste
- Metals, lobster traps, brush, yard waste Its closure threatens our community's ability to manage waste responsibly.

four

We Demand:

- Transparency from Council
- Public consultation before decisions are made
- Spend on services NOT on ill defined schemes like Hartz Point

five

Speak Up!

Say NO to privatization. Say YES to sustainable, accountable public services. Your voice matters—make it heard.

Go to: protectshelburne.ca and sign our petition

Open Letter of Protest: Closure of the Shelburne Materials Recovery Facility (West Green Harbour Dump)

To the Council of the Municipality of Shelburne,

I am writing to formally express my concern and opposition regarding the planned closure of the Regional Materials Recovery Facility located in West Green Harbour, as announced in the Municipality's recent undated press release.

The Council has had two years' notice from the Province regarding the need to meet updated permitting standards set by Nova Scotia Environment and Climate Change. During this time, there has been a lack of transparent communication with residents about the options being considered and the implications for our community.

The press release states that the decision to close the facility follows a "thorough review" of its long-term financial and operational viability, citing an estimated \$1 million in required upgrades as "cost-prohibitive." However, the proposed course of action—to privatise the facility and allow for-profit companies to assume its role—raises concerns. This transition from a municipally operated, cost-recovery model to a privatised system will likely result in increased financial burdens for residents and reduced local control over waste management services.

The Materials Recovery Facility has served as a key part of our region's waste management infrastructure. Its closure not only affects the disposal of construction and demolition materials, metals, lobster traps, brush, and yard waste, but also undermines the principle of public accountability in essential services.

I hereby register my formal protest against the closure and privatisation of the Shelburne Materials Recovery Facility. I urge the Council to reconsider this decision and to engage in meaningful consultation with residents to explore sustainable, community-based alternatives.
