Re: Appearing to Council

To: Council of the Municipality of the District of Shelburne

We don't want to take a lot of the council's time; we just want to voice our concerns before council as a community. I will be the only person presenting. We will have a meeting on Saturday to make sure I have everyone's concerns and points in one presentation.

Talking points will be:

- Traffic
- pollution of the ocean, soil, air, and our wells
- noise and light pollution and the effect that has on our quality of life and our investments

We request that seeing as the municipality was required to zone years ago and hasn't done so, that there be a stay of permits for industrial businesses in areas that have a residential majority, without petitioning their neighbours, until zoning has been successfully completed by council.

This is not an issue against the fisheries. We are, as a community, pro fishing industry. We only want everyone in Shelburne county to be protected from any industrial factory or plant from setting up shop in peaceful, environmentally healthy, residential areas.

Thank you so much in advance for hearing us out next week.
I hope you (and your pipes) all stay warm this weekend.

Kind regards,
Lauren Hammersley
